THE NEW WORLD OF THERAPEUTIC ELECTRO-MAGNETISM

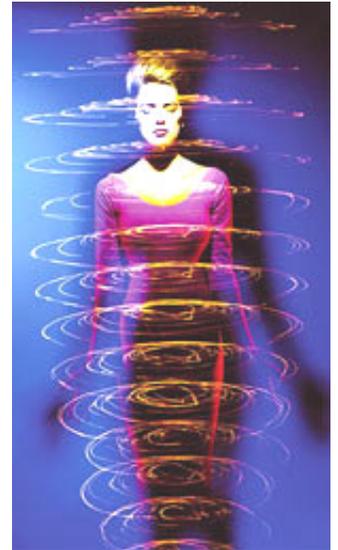

"Electromagnetic energy is the elemental energy on which all life and organisms depend on."

~Prof. Dr. Werner Heisenberg,
German Physicist, Receptient of the Nobel Prize.

WE ARE ENERGETIC BEINGS - THE BATTLE FIELD

The body is an environment composed of both chemical and electrical fields and at anyone time we are only as healthy as our cells can be in that environment. Our cells are like an electric battery; subject to states of charge or depletion. Electricity trumps chemistry. Our cells conduct the electrical charges created by our central nervous system. **Each cell functions as a receiver as well as transmitter, conducting the flow of electricity as well as chemicals.** A compromised electrical system results in faulty communications; no messages are sent and no healing chemicals can be manufactured.

French scientist George Lakhovsky, who's work was inspired by the work of Nicola Tesla, viewed disease as a battle of vibrations between the body's cells and pathogenic viruses and bacteria. If the cell was energetically weak, the invading organism could win this "vibration contest," thus infecting the cell. **Today we have entered an era where we can, via machines broadcast a therapeutic electromagnetic fields;** bring our own cells into a state of RESONANCE; strengthening the energy-field of each cell and thereby fortifying and protecting ourselves from the attack of disease causing organisms.

MRS - THE MAGNETIZING WAY TO STAY HEALTHY

MRS 2000+ restores lost energy and crippled cellular resonance to a normal, healthy state of vibration. As a result, the entire cell metabolism is stimulated, blood cells are regenerated, blood supply moves more freely and with more oxygen, immune system in strengthened, vitamins and minerals are better absorbed, the respiratory system becomes more efficient, the nervous system is relaxed, bone structure becomes more dense and organs such as liver, kidneys, and spleen are able to detoxify, ridding themselves of impurities and regaining their designated bodily functions.

The effect of one application using the **MRS 2000+ lasts up to 4-6 hours in healthy people.** Most people do not feel any noticeable sensation when starting therapy. "Sensing" nothing only means that the magnetic field is having its effect without any outward signs. If people are very tense, nervous or under stressed they generally need low field intensities (settings) to obtain relaxation. If the person is exhausted and tired the brain becomes receptive to the low frequency magnetic stimuli. The frequencies encapsulated in the **double-sawtooth signal trigger beneficial responses in that part of the brain responsible for the symptoms of stress and depression, leading to more complete rest, relaxation, deep sleep and regeneration.** The aim is to reduce the level of stress/depression through better rest and deeper sleep. For inducing deep sleep, the most appropriate time to use the mat applicator is within the hour before going to bed. Try to remain sensitive to the "experience and results" of particular settings at particular times of day. **Settings depend on body mass, blood pressure/pulse, level of stress, age and health challenges.**

MODERN THERAPUTIC ELECTROMAGNETIC FIELD

"Magnetic Resonance Stimulation" is not a static magnet, but a Resonating Magnetic Field (RMS). MRS 2000+ (Magnetic Resonance Stimulation) contains **NO MAGNETS.**

The statements are considered individually expressed opinions of wood_pub@yahoo.ca and do not reflect the opinion of MediConsult.

Electromagnetic therapy applies magnetic fields—either static or pulsed. Low Pulsing Magnetic Fields (PEMF) are used instead because a constant magnetic field is unable to penetrate the whole body and also the body's cells soon become used to a constant magnetic field. The pulsating field can be optimized to the correct frequency of vibration to effects the whole system and its long term use has many benefits. **With low pulsating electromagnetic fields the cells can not be damaged.**

Pulsating Magnetic Field therapy in three major areas:

1. **To alleviate stress**, such as mental and physical stress and jet lag, for relaxation and meditation, to increase potency, for cell regeneration, for building up muscles (athletes), to stimulate nerves and for treatment of pets/animals.
2. **For prevention of disease** by fortifying the immune system
3. **For treatment of many acute and chronic diseases**, and also for the elimination of, or at least relief from, chronic pain

Today, magnetic therapy is well established worldwide. **Japan has given official approval for the use of pulsed magnetic devices for healing.** Over 1000 clinical studies world-wide document the effectiveness of **Magnetic-Resonance- Stimulation.** The German-made MRS 2000+ designo is the “next step” as well as the new benchmark in the field of **pulsating magnetic therapy** for home, medical or clinical use.

MRS 2000+ designo® STATE-OF-THE-ART LOW PULSATING MAGNETIC SYSTEM

The frequency package that is embodied in the **MRS 2000+ designo® pulsed electromagnetic signal produces a magnetic resonance stimulation** effect that imitates the low magnetic fields that occur naturally in our bodies. **MRS 2000+ designo® is a regulation/balancing system**, which works at the cellular level to “normalize” the fundamental metabolic functions of every cell in the body. Research has shown that magnetic resonance stimulation effectiveness is not through heat production - as is the case with some modern treatments. It is at the cellular level. When the cells vibration is restored to its natural state of RESONANCE this creates an ideal condition of **resonance/coherence** within the body so the body's own intelligence can do the healing. MRS 2000+ simply replaces a very essential and profound element that has always been apart of life and is now lacking in our modern lifestyles.

MRS 2000+ designo® is used by over 4,000 athletes and over 400,000 customers in Europe, **MRS 2000+ is the most-sold and documented magnetic-resonance system in the world.** **MRS 2000+ designo®** is an ideal therapy to be applied as an adjunctive therapy. Examples include homeopathics, supplements, chemotherapy, drugs, acupuncture, massage, etc. The absence of side effects ensures that **there is no conflict between treatments.**

MRS 2000+ is used to support healing of: Allergies, Arthritis, Asthma, Bowel Disorders, Back Pain, Bone Injuries, Chronic Diseases, Depression, Diabetes, Fibromyalgia, High/Low Blood Pressure, Injuries, Joint Pains, Migraine, Multiple Sclerosis, Menopause, Osteoporosis, Rheumatism, Rejuvenation, Spinal Disc, Immune System, Circulatory disorders, Lack of energy, Sleep Disorders, Depression and much more in short the MRS 2000+ supports Healing of every cell simultaneously.

The MRS 2000+ whole body mat containing three pairs of coils, which are placed on a level with the lower limbs, the lumbosacral region and the scapular region for treatment of the entire body. Another accessory consists of a Local Applicator Pad containing two coils for local treatment. **The use of pulsed magnetic fields allows the body to function normally despite heightened environmental stresses. Atmospheric pressure changes are alleviated and interference from electrical household appliances and computers is neutralized.**

MRS - “NO PAIN, NO GAIN” PRINCIPLE IS NOT VALID

The whole of body treatment approach is required if every cell is to be influenced. Those with chronic and degenerative pain may benefit by applying the mat applicator only so that every cell is treated and so all cell dysfunctions (not only pain) receive a beneficial effect. **Metal implants in the form of artificial joints and the like, have no negative effect.** The magnetic field will penetrate any metal. It is not the field strengths or high magnetic field intensities that will lead to quicker therapy success. Very often low intensities help more. **For optimal results the MRS 2000+ applications should generally be up to three times per day for eight minutes each application.** MRS 2000+ system has been invented to be a gentle and longer term therapy and the “no pain no gain” principle is not valid.

MRS 2000+ THE REVOLUTIONARY “SAWTOOTH” WAVE IMPULSES

The MRS 2000+ designo® pulsating electromagnetic field (PEMF) is not a constant energy flow but instead has frequencies that differ regularly from time to time so that they flow in a wavelike form, specifically, sawtooth-shaped waves impulse which varies from strong to weak. Every two minutes while lying on the MRS 2000+ whole body mat the direction of the saw tooth magnetic field changes. This change of direction stops the body's natural frequencies becoming accustomed to the external stimulation and enhances the level of stimulation. The effective electromagnetic field extends for a distance of about **1/2 meter in all directions from the mat penetrating the body completely.**

One of the less known – and most effective - uses of pulse magnetic fields is for working with acupuncture points. Each of the meridian points correspond to related regions, organs, and systems of the body, connected through structures of nerves. By applying therapeutic magnetic field (using the MRS probe) to meridian points cause a natural bioenergetic balancing and faster healing effects to occur.

MRS – USING NORTH AND SOUTH POLARITY

MRS 2000+ designo® provides a north and south polarity which changes every two minutes during a session. North and South Pole have opposite spin directions and different healing effects. **North, the negative pole,** stabilizes biological activity, calms and sedates, and reduces pain, infection and inflammation. North polarity produces "cold energy" and is used to treat "hot" problems such as pain, inflammation and infection. It sedates and draws out pain and localizes bacteria so it is easier for the body to fight infection. **Magnetic negative energy maintains proper blood and tissue alkaline ph.**

Research indicates that Pulsed Electromagnetic Fields:

- Improve circulation and the delivery of oxygen to the brain, vital organs, and virtually every cell of your body.
- Stimulates ATP production to provide more energy for the cells. ATP is estimated to provide 95% of all cellular energy throughout the body.
- Enhances strength, stamina, flexibility, concentration, and recovery in athletic individuals.
- Regeneration of the body's cells- Promotes faster healing of strained muscles and sprained ligaments
- Accelerating the healing of post-operative healing of tissues, scars, etc.
- Enhances the healing of muscle injuries from strains, sprains, tendonitis and bursitis.
- Improves regeneration & speeds recovery from physical exertion, strenuous workouts, etc.
- Positive effects on pain reduction resulting from various causes - arthritis, back pain, bursitis, muscle stress, etc.
- Improve blood circulation and micro-circulation - reduce blood platelet adhesion (stickiness).
- Strengthening of the bone structure – a measurable increases in bone density with daily use.
- Regulates high and low blood pressure - **stimulates natural release of Nitric Oxide** to relax and expand blood vessels.
- Balances the body's acupuncture meridians in just eight minutes.
- Nerve regeneration: Damaged cells can be stimulated to regenerate by suitable pulses from a magnetic field. Electromagnetic fields cause a type of electric current pulse, which **stimulates the nerve cells to “grow”.**
- Acts “**CALMATIVE**” on the nervous system to relieve stress and aids relaxation.
- Normalization of heart rate: Tests have shown that the heart rate can be influenced in a positive sense through the regulatory effect of a magnetic field on the autonomic nervous system.
- Revitalizing the immune system - intensity does not over-stimulate the body.
- **Reduce the damaging effect of electro-smog.** The low pulsating electromagnetic field intensity induced by MRS 2000, interferes with “electromagnetic smog” eliminating their polluting effect.
- Generally has no adverse reactions other than it provides a body restorative cleansing affect on your health.
- **Deepens restful sleep by increasing circulation throughout the body which creates an overall feeling of relaxation and improves melatonin production.**
- **Helps relieve pain by stimulating the body to produce increased amounts of natural pain inhibitors.**
- **Due to improved metabolism and improved circulation medication can reach target cells more easily.**
- German engineered to the highest standards in the world, easily administered with a line of accessories.
- The MRS 2000+ designo® is a consumer accessible devices to use a micro-Tesla or 0.05 to 0.5 gauss field device.
- Backed by years of scientific research - *scientific evidence about safety or effectiveness*
- Wholistic approach to health and wellbeing, right in your home that has safe, long-lasting beneficial results.
- CERTIFIED MEDICONSULT HEALTH TECHNICIANS available for customer support.
- THREE YEAR WARRANTY on MRS 2000+ Home and Med units.

THE OBJECTIVE OF THE MRS 2000+ HOME & MED VERSIONS:

- ▶ Simple and Effective
- ▶ Available For Home Use
- ▶ Without Much Time Expenditure

Both the Home and Med units come with a mattress for full body use and the pad for local application for arms, legs, back, etc, and can be used for the whole body during travel. The use of the full-body mat, allows for maximum frequency, while harmonizing with the different time zones of each day (Chinese organ clock divides the day in four time zones - mornings, midday, evening). MRS 2000+ is designed to switch off automatically at the end of the treatment. Organs and hormonal glands should not be activated with the same intensity at all times of the day. The cell groups and organs of the body behave like side-by-side "tuning forks": If their own frequency is reached during treatment, their vibrations are intensified and their energy potential is increased accordingly.

The MRS 2000+ Whole Body Mat containing three pairs of coils, which are placed on a level with the lower limbs, the lumbosacral region and the scapular region for treatment of the entire body. Another accessory consists of a Local Applicator Pad containing two coils for local treatment.

MRS 2000+ MED VERSION

✓	Med Unit includes: (1) the Controller (2) Probe (3) Whole Body Mat (4) Applicator pad
✓	Chip card
✓	Offers a higher intensity (sensitive up to 400)
✓	Optional Accessories: Sound & Light Relax System
✓	3 year Warranty
✓	ALLOWS FOR FUTURE UPGRADES

AN IDEAL MRS 2000+ ACCESSORY

SLRS - Sound & Light Relax System is a microprocessor controlled device designed to be used with the MRS Controller. The SLRS system consists of a light/sound synthesizer, stereo head phones, and stimulation glasses with pulsating lights. Built-in light/sound sessions direct the stimulation synthesis, creating a carefully composed sequence of rhythmic light and sound patterns. The tone, frequency, pitch and other parameters of the light and sound stimulation vary the effect, just as different styles of music do.

The MRS can be ordered direct from the manufacturers in Canada and shipped to your home. Of course, when you order your MRS 2000+ you'll get the benefit of all 3 modes of application: the full body mat, the localization pad and the probe for small areas like sinuses, elbows, wrists, ankles, fingers and jaw joints. And you'll be provided with an introductory guide of basic information to get you started. When you need support you simply contact your CERTIFIED MEDICONSULT HEALTH TECHNICIAN for the answer. Your ownership of your own MRS 2000 is an investment in your health, vitality and your life! It's NEW SOFTWARE FOR YOUR CELLS!

MediConsult®
THE HEALTH TECHNICIANS

Your Body will thank you for it!

SLRS – SOUND & LIGHT RELAX SYSTEM - AN IDEAL MRS 2000+ ACCESSORY

SLRS is a beneficial high tech way to control your mind and mood using light and sound to entrain your brainwaves!

SLRS - Sound & Light Relax System is a microprocessor controlled device designed to be used with the MRS Controller. The user selects a session, puts on headphones and stimulation glasses, and sits back and enjoys the experience, which can be for relaxation, stimulation, meditation or just plain fun depending on the session.

Our brain oscillates in 4 different brain wave regions which each have characteristic frequencies (alpha, beta, delta and theta waves). These four frequencies decided on whether we are in a state of complete concentration, in a relaxation, dream or deep sleep phase. The brain has the ability to adapt to oscillations it receives from outside by using specific pulsation patterns, the SLRS - Sound & Light Relax System can stimulate wide awake, relaxation, deep sleep and dream states.

The SLRS system consists of a light/sound synthesizer, stereo head phones, and stimulation glasses with pulsating lights. Built-in light/sound sessions direct the stimulation synthesis, creating a carefully composed sequence of rhythmic light and sound patterns. The tone, frequency, pitch and other parameters of the light and sound stimulation vary the effect, just as different styles of music do.

SLRS produces a quicker change to the desired level of consciousness through optical and audible signals, while facilitating relaxation and stress-reduction. The 4 bio-rhythms of the MRS 2000+ in combination with the SLRS offer extensive possibilities for mental training and stimulation of the consciousness. Depending on the program selected, increased energy, relaxation, sleep, meditation and improved concentration, learning ability and memory are being promoted.

The SLRS - Sound & Light Relax System can only be used together with the applicator mat for overall body treatment using the stroboscopic glasses, the headphones and the audio connection. Included is the SLRS chip card which is required to start operate the SLRS system, the chip card is simply inserted at the back of the MRS 2000+ power controller.

Depending on the respective session program selected, you can support and stimulate relaxation and sleep promotion or concentration and learning. The ability of the body to react to the effect of the magnetic field can be supported considerably by connecting a sound system (ex. CD player, MP3 player etc.) to underline the overall process with relaxing music. The flickering lights, seen through closed eyelids, create moving, colored, dynamic patterns (visuals) that will amaze you the first time you experience them. You can move your eyes and change the effect. You can concentrate on the patterns and change what they seem to be doing. A beginning user of SLRS should experience a session regularly (every day or close to that) for the first few weeks. Don't overdo it -- an hour a day is a lot.

Benefits of SLRS and MRS2000+:

- Enhance your musical experience
- Psychological stress relief
- Deep relaxation
- Assistance in falling asleep/Induces Theta state
- Memory improvement-"sets" reading material for better recall
- Increase learning-sharpens concentration
- Stabilizes emotions/alter moods
- Increase intellectual focus-clear and positive thinking
- Sensory stimulation-spawns neural pathways
- Increase physical energy and creativity-releases endomorphins
- Increased well being
