

# Welcome to the MyFloridaMarketPlace Aravo Standard Catalog Upload Tool

The Florida eProcurement Catalog Upload Tool is a fast and easy way to get your catalog uploaded and into the Aravo system. If you make a mistake with this tool, simply correct your data and upload again; the existing products will be updated. Notice that some text may extend past a cell's boundary-your text is still there and can be viewed by clicking or double-clicking on the cell itself.

1

Enter your data into the 'Products' sheet, putting the data in the most appropriate columns. A darker column indicates a required field. The lighter fields are not required. Click the Sample tab for examples of correct product entries. Mouse over the column headings for column specific guidelines.

2

Product descriptions must be 255 characters or less. (Including spaces) Refer to the illustrative examples in the contract format design document for exact product description formatting specifications for each product group. List the base item, and then it's attributes in the order prescribed. Remember product description consistency is vital to ensure accurate search results when buyers are shopping from your catalog.

3

Continue entering all of the required data, and any of the optional information you wish to include for each product. Once your data is as you like it, while in the Product worksheet choose **File > Save As'** from the menu and select a location for the file on your computer, rename the file, and click the save button. This is the file you will upload to Aravo, so be sure to keep it in an easy to find location

\*

## Business Forms (B Forms)

B forms are used to capture various order information for products which have options to select, such as size or color. Not all data templates use B forms. Enter the bform name into the appropriate column. Refer to your design document for the B-form name/names being used for your products. To enter b-form options, you must first enter a space followed by a comma. Each option is then listed separated by commas only. **Do not put spaces between your options.**

For Example:

Color options for a t-shirt would be  
.red.blue.white.gray

Size options would be:  
.s.m.l.xl.

Contact your supplier manager if you have questions or need assistance with your template.
