

# CAMO VINYL

Thank you for purchasing my camo vinyl.

Not sure if you read the disclaimer on my website about the possibility of each camo sheet being + or - 1 inch from the size listed on my site.

I purchase camo sheets in 8 foot x 10 foot sheet and sometimes those sheets are off by as much as half a foot from my supplier. This in turn makes my final cut sheets of 6x12, 12x12, and 12x24 smaller, this is the reason for the disclaimer. I hate to sell the sheets this way but this is my only option.

Just letting you know about the size as a courtesy.

Also, sometimes the camo vinyl will look as if it is crinkled on the back, this shouldn't be a problem on the front because the camo vinyl is very thick and it should not affect the front side.

Camo vinyl is almost always dirty on the paper backing when it is delivered to me from my supplier. I have no clue why this is, but it seems every time I order camo sheets they are dirty on the back. This also should not be a problem because the paper backing will be thrown away after you cut out your designs/images.

Email or call me ANYTIME
